Situational Analysis

No Central System

Items get lost on campus every day
with nowhere to report them.

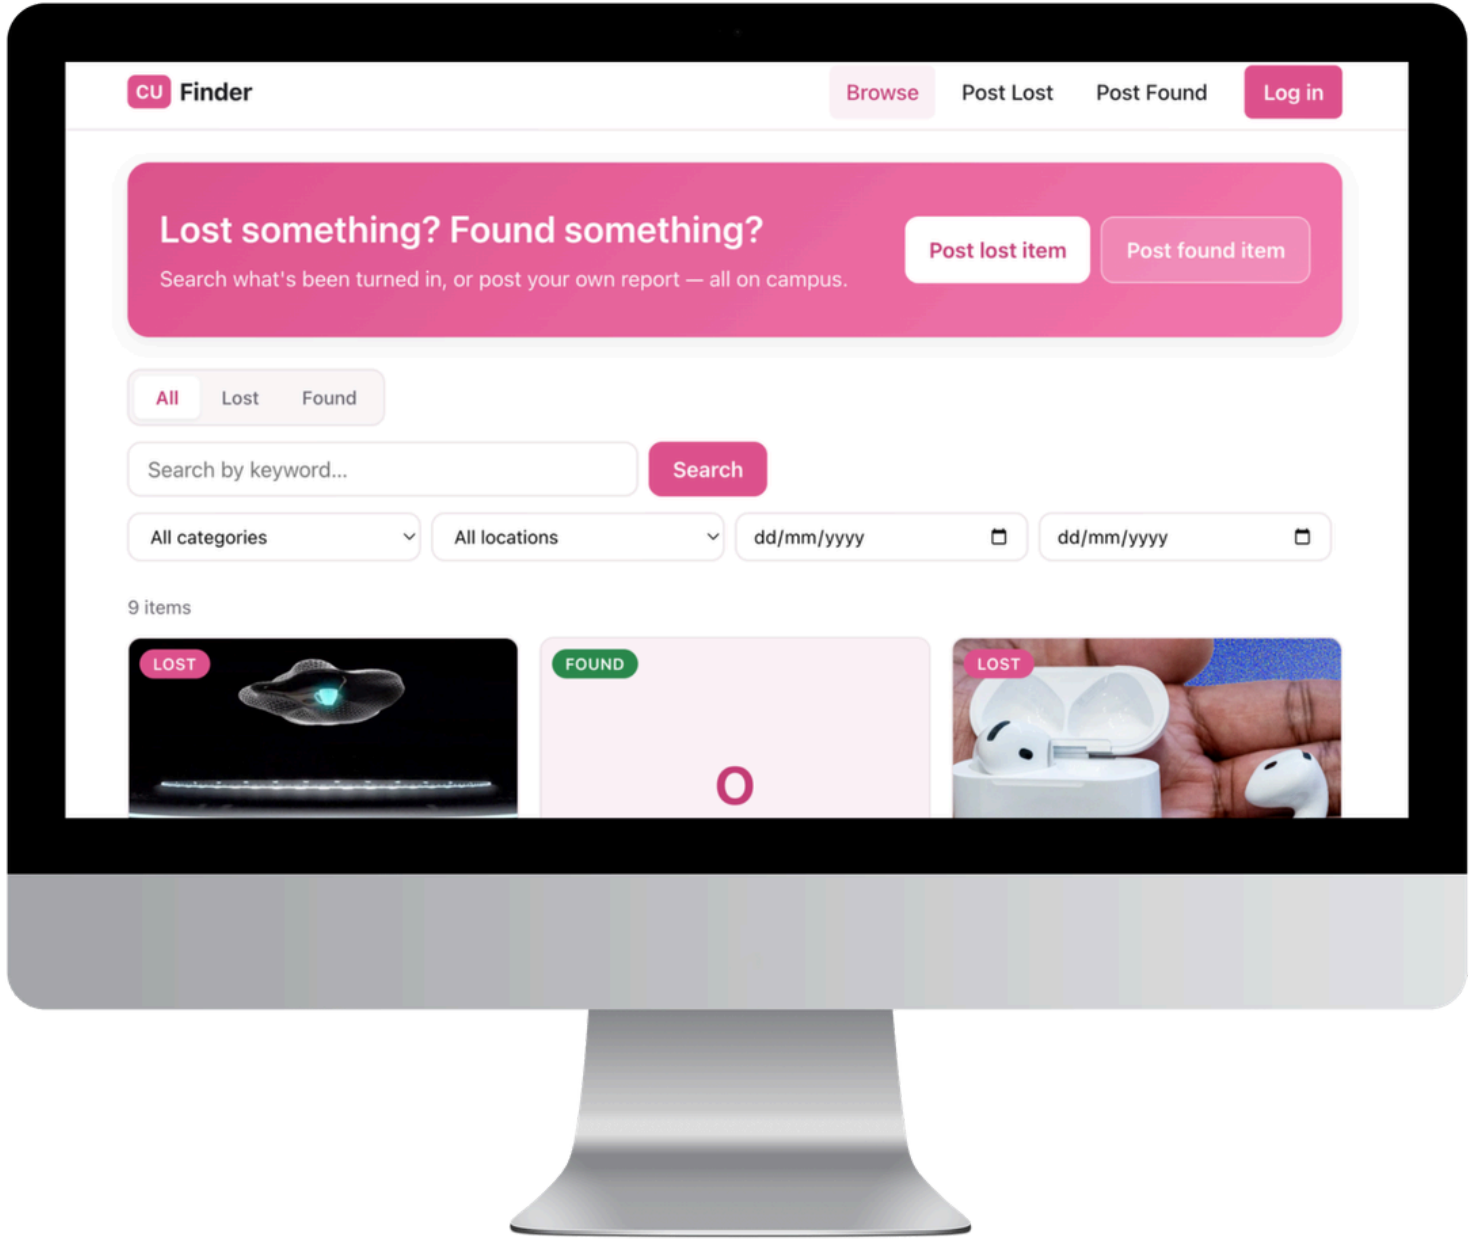

Scattered Information

Reports spread across social media
and word of mouth
hard to track.

No Connection

The person who lost and the person
who found rarely connect.

CU Finder

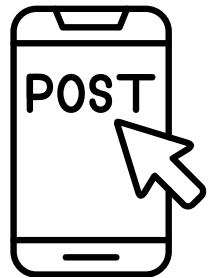

A web app where anyone with a CU email can post, browse, and reclaim lost or found items with admins managing items per building

Forgot Password?
Login

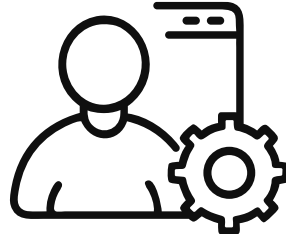

**Login securely with
CU Google email**

**Browse & filter by
category, location,
date**

**Post lost or found
items with photos**

**Building admins
manage held items**

Frontend

React + TypeScript · Vercel

Auth

Google OAuth · CU domain only

Backend

Python Flask · Render

Image Storage

GridFS · via MongoDB

Database

MongoDB Atlas · Cloud

Mobile

Site admin

Welcome, Khammanat Limpanapongthep. You can manage campus locations and moderate any listing on the site.

Campus locations

Locations appear in the dropdowns when posting. Drop-off locations are listed when a finder picks where to leave the item.

Campus map view

01

Google OAuth Cross-Origin Cookie Issue

Solved by routing auth through a Vercel proxy to handle cross-origin cookies correctly.

02

Frontend & Backend Independence

Maintained a clean shared API contract so both sides could be developed and deployed independently.

03

Free-Tier Deployment

Successfully deployed the full stack — MongoDB Atlas, Render, and Vercel — entirely on free tiers.

THANK YOU
